

ASTRAL

Portable table luminaire

A warm 1800K atmospheric layer for
hospitality and residential interiors.

Design Philosophy & Optical Core

A portable table luminaire with a compact faceted body and a broad translucent optical disc, designed to create a warm upward atmosphere layer.

Translucent optical disc.

Rather than serving as a primary illumination, it is purposefully specified to introduce a soft, low-level atmosphere layer into sophisticated architectural spaces.

Restrained Reflection

The downward light distribution onto the tabletop is meticulously restrained to eliminate harsh, distracting glare from polished surfaces.

Luminous Focal Point

The primary visual effect emanates directly from the warm, micro-structured luminous optical disc, acting as a quiet anchor for the eye.

Ultra-Warm CCT

1800K CCT, it emulates the comforting, intimate glow of a traditional flame

Micro-structured
optical disc

Warm ambience

T6 should be specified as a soft, low-level atmosphere layer. The downward reflection on the table remains restrained; the main visual effect comes from the warm luminous optical disc.

Three-step dimming for atmosphere control

The dimming sequence should be communicated visually: not as higher technical output, but as different levels of evening atmosphere.

Low

quiet bedside / late evening

Medium

table presence / lounge

High

restaurant table / visual focus

Portable, simple

Charging

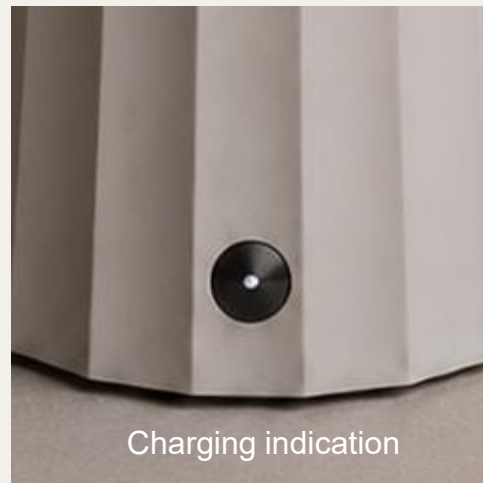

USB-C port

Battery

48-hour runtime, depending on operating brightness

Indicator

Charging status indicator on body

Charging indication

*project finish options

A compact architectural element

Custom colours can be accommodated on a project-by-project basis to match specific interior design palettes.

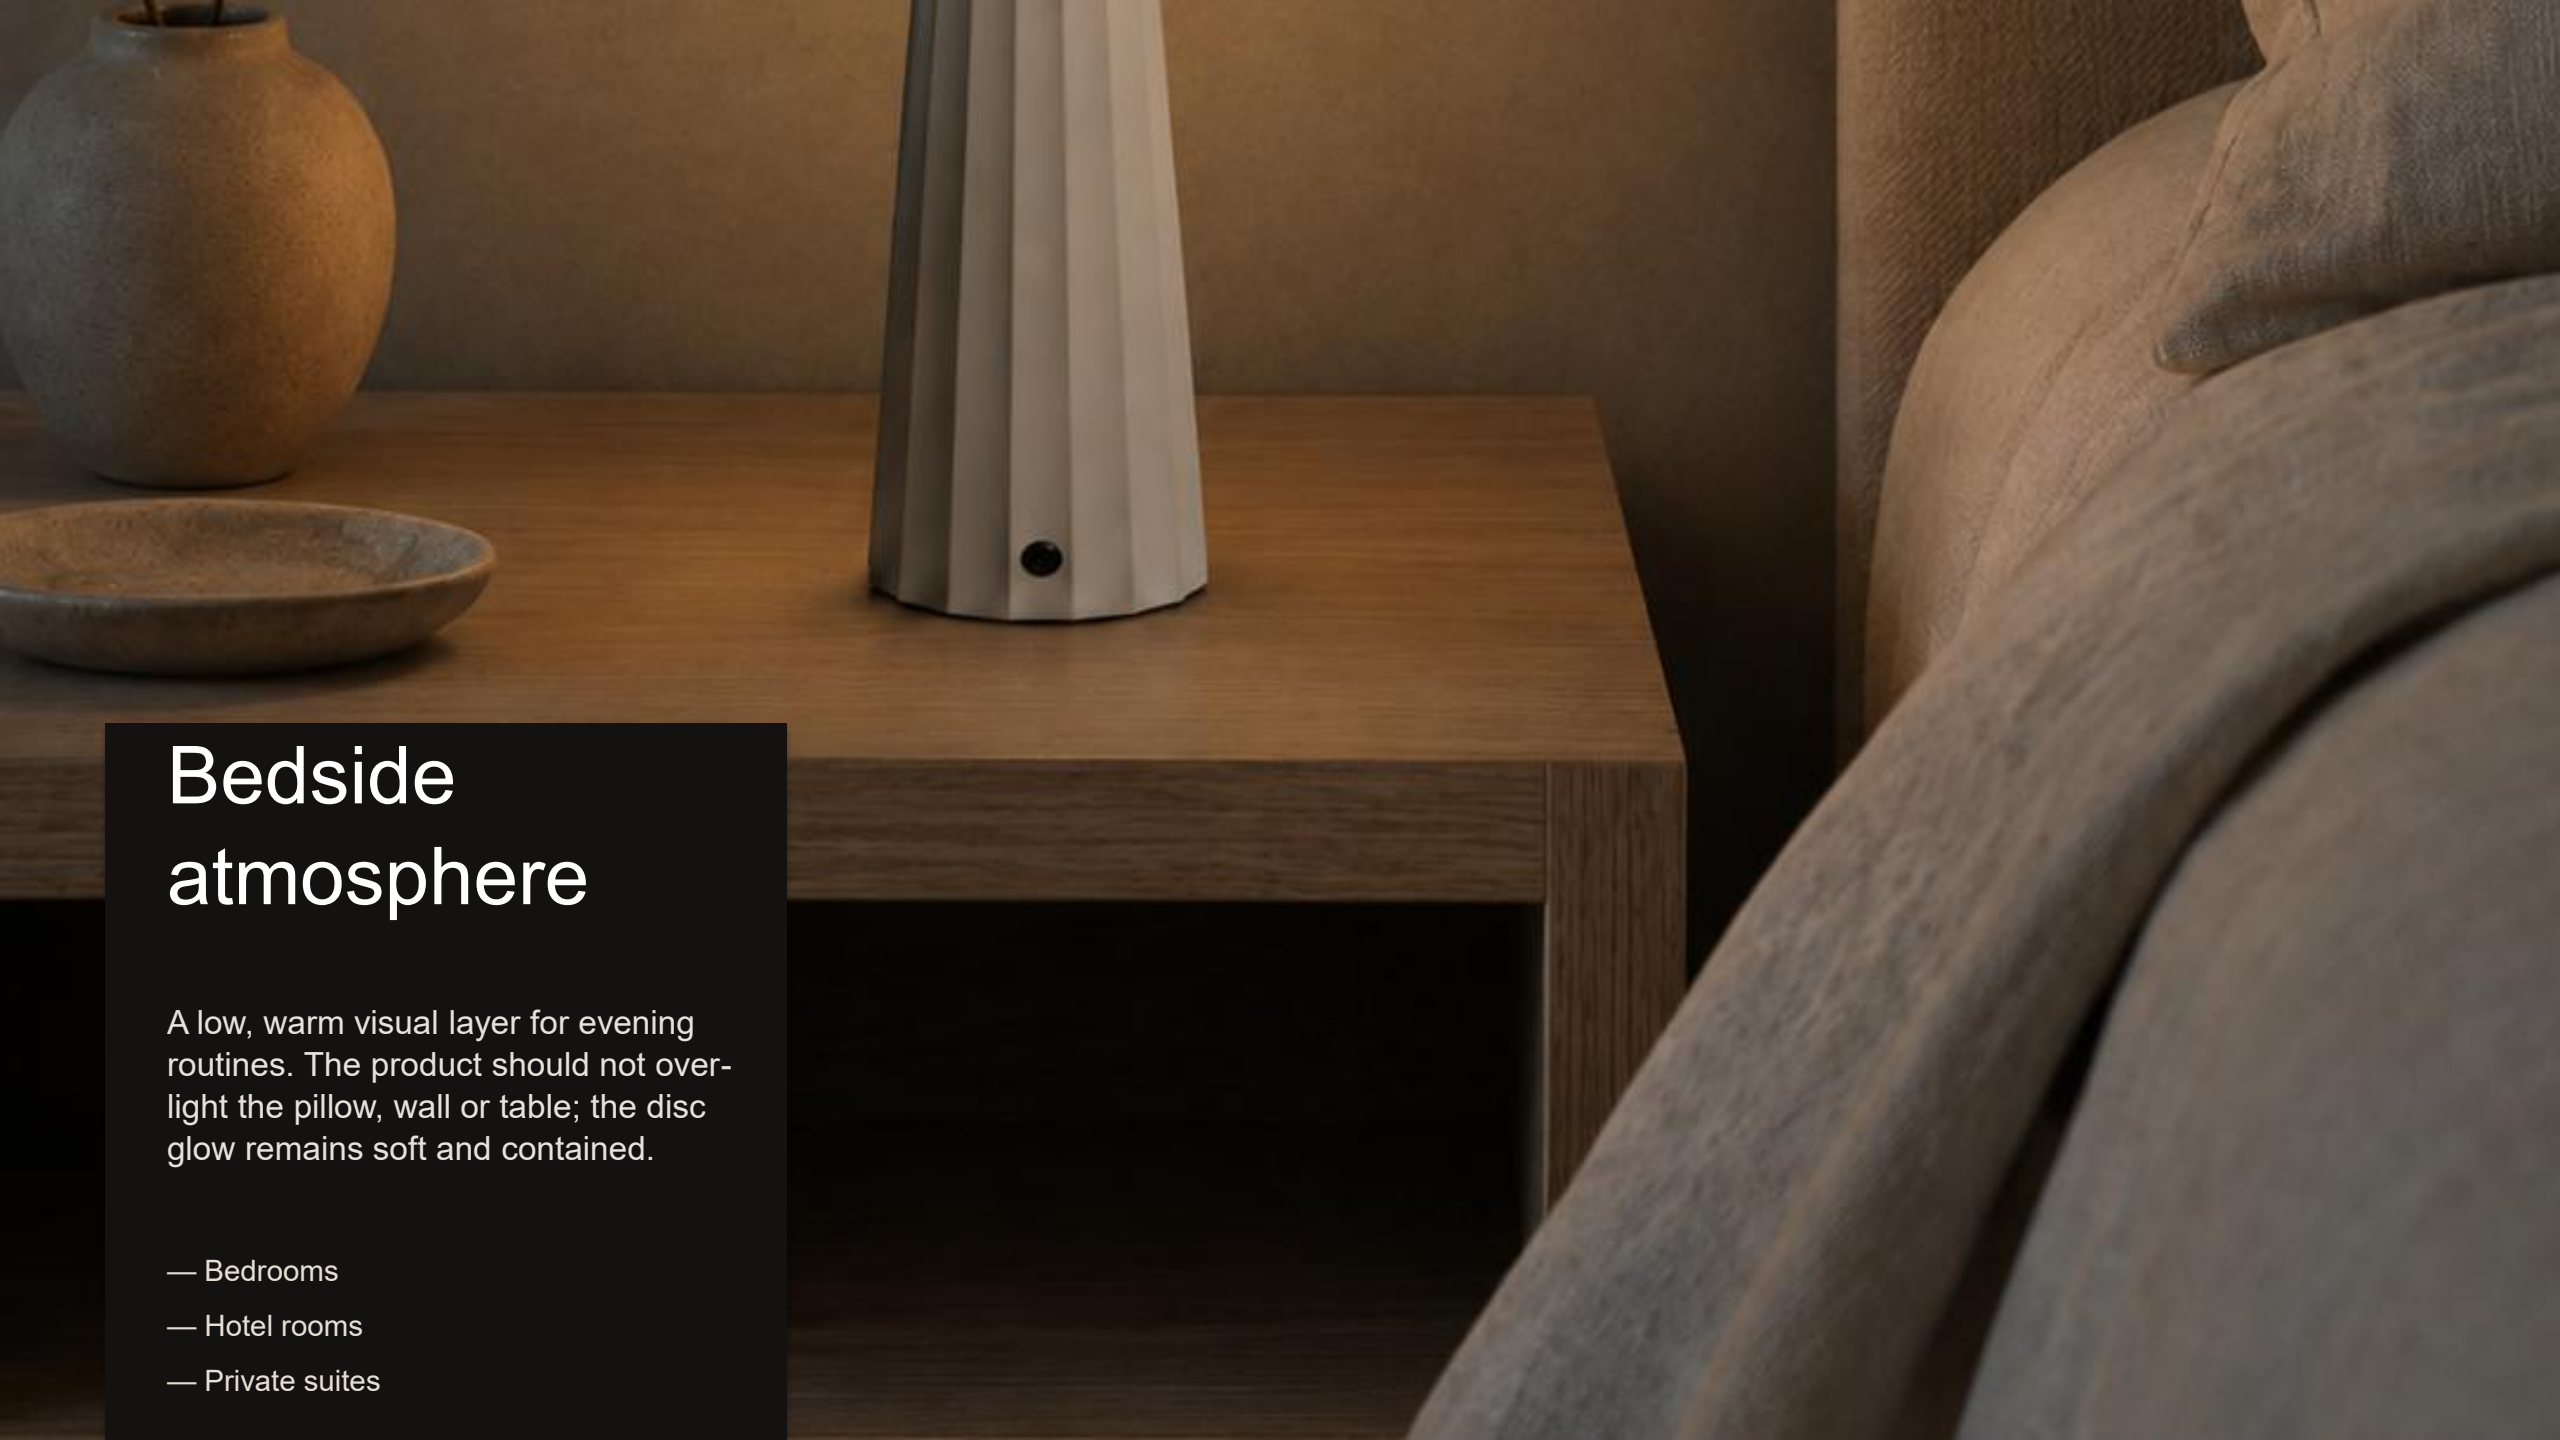

PRODUCT GEOMETRY

Series	ASTRAL table luminaire
Model	T6
Height	224 mm
Optical disc	Ø163.6 mm

OPERATION AND LIGHT

Material	Lamp body: Cement, Aluminium + PC
Standard finish	Matt Light Gray
CCT	1800K CCT as standard; other CCT or RGBW upon request
Dimming	Three-step brightness
Control	Touch switch
Power	USB-C; charging indicator; use while charging; 48 h runtime

A photograph of a minimalist bedside table made of light-colored wood. On the table sits a tall, white, faceted lamp with a small black dot at its base. To the left of the lamp is a round, textured ceramic bowl. Further left is a large, rounded, textured ceramic vase. In the foreground, a portion of a bed with a light-colored, textured fabric is visible. The background is a plain, light-colored wall.

Bedside atmosphere

A low, warm visual layer for evening routines. The product should not over-light the pillow, wall or table; the disc glow remains soft and contained.

- Bedrooms
- Hotel rooms
- Private suites

Lounge or residential corners

Adds a small visual anchor on side tables, shelves and quiet corners where architectural lighting may feel too remote.

- Useful as a portable visual cue at seated eye level.
- Works best with low background illumination.
- Avoid presenting it as the only room light source.

Fine Dining

A small rechargeable luminaire can create table-scale atmosphere and wall/surrounding reflected ambience

- Boutique restaurants
- Hotel bars
- Private dining areas
- Event tables

A quiet portable layer for
warm interiors.
